

NXTI | Simplify NEXT Intangible Core Index ETF

FUND OVERVIEW

The **Simplify NEXT Intangible Core Index ETF (NXTI)** seeks to provide investment results that track, before fees and expenses, the performance of the NEXT Intangible Core Index.

The index will select companies with high intangible capital-to-book asset ratios within their respective sector. The research behind the development of the index supports the idea that companies with high intangible capital-to-book asset ratios outperform companies with low intangible capital-to-book asset ratios over time.

PERFORMANCE REVIEW

In the fourth quarter of 2024, NXTI delivered a return of 1.85%, reflecting positive performance across a broad range of sectors. Notable gains were observed in Information Technology, Communication Services, Real Estate, and Financials. However, these were offset by negative returns in Materials, Health Care, Industrials, and Energy.

Key drivers of NXTI's performance during the quarter included strong contributions from Palantir Technologies, Applavin, and Walmart. Conversely, Adobe, United Healthcare, and Idexx Laboratories detracted from relative returns. Relative to the Russell 3000 Total Return Index, NXTI underperformed during the period, primarily due to stock selection in the Consumer Discretionary, Financials, and Energy sectors.

Looking ahead, NXTI will maintain its focus on selecting companies with high intangible capital-to-book asset ratios within their respective sectors, supporting its long-term investment strategy.

Performance as of 12/31/24 | Inception Date: 04/15/2024

DEFINITIONS

Market Price: The current price at which shares are bought and sold. Market returns are based upon the last trade price.

NAV: The dollar value of a single share, based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated at the end of each business day.

NEXT Intangible Core Index: The index begins with the top 2,000 stocks from the Solactive US 3000 Index. From this list the index selects the 200 stocks with the highest intangible capital-to-book asset ratios within their respective sectors. Minimum number of securities per sector is 5, with a maximum individual weight capped at 5%. Stocks will be re-ranked and the index rebalanced quarterly.

Capital-to-Book: The ratio of the market value of a company's shares (share price) over its book value of equity.

Russell 3000 Total Return Index: Measures total return of the top 3000 companies by market capitalization in the United States.

SEC 30-Day Yield: The yield is calculated with a standardized formula and represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price. The yield includes the effect of any fee waivers and/or reimbursements. Without waivers, yields would be reduced. This is also referred to as the "standardized yield", "30-Day Yield" and "Current Yield". The unsubsidized SEC 30-Day Yield does not reflect the effect of any fee waivers and/or expense reimbursements.

IMPORTANT INFORMATION:

Investors should carefully consider the investment objectives, risks, charges, and expenses of Exchange Traded Funds (ETFs) before investing. To obtain an ETF's prospectus or Summary prospectus containing this and other important information, please call (855) 772-8488, or visit SimplifyETFs.com. Please read the prospectus carefully before you invest.

An investment in the fund involves risk, including possible loss of principal.

The fund is subject to the risk that the strategy may not produce the intended results. The fund is new and has a limited operating history to evaluate.

Concentration Risk: The Fund may focus its investments in securities of a particular industry or group of industries.

Small and Medium Capitalization Risk: The earnings and prospects of small and medium-sized companies are more volatile than larger companies and may experience higher failure rates than larger companies.

Value Risk: A company may be undervalued due to market or economic conditions, temporary earnings declines, unfavorable developments affecting the company, and other factors.

Tracking Error Risk: Tracking error is the divergence of the Fund's performance from that of the Index.
