

SPBC | Simplify US Equity PLUS Bitcoin Strategy ETF

Overview

The **Simplify US Equity PLUS Bitcoin Strategy ETF (SPBC)** seeks to provide capital appreciation by providing an efficient way for asset allocators to add Bitcoin exposure to portfolios. The fund targets a 100% investment in US equities while simultaneously providing a 10% exposure to Bitcoin via exchange traded products (including affiliated Bitcoin ETFs).

The fund provides operational simplicity for investors by actively managing the rebalancing of the Bitcoin allocation. Rebalancing will generally occur quarterly but can rebalance more frequently to ensure the Bitcoin allocation does not exceed 25% of total assets.

Key Points

- Provides an easy way to add Bitcoin exposure to portfolios
- Invests 100% in the US equities + 10% Bitcoin exposure
- The fund greatly simplifies the operations surrounding crypto investing, including rebalancing
- ETF wrapper provides attractive transparency, liquidity and tax treatment
- No K-1 tax forms

Strategy Details

- Fund targets 100% exposure to US equities by investing in equity ETFs, equity securities of US companies and equity futures contracts
- Fund manages adds an additional 10% allocation to Bitcoin via Bitcoin related exchange traded products, with a maximum allocation capped at 25%
- Regular rebalancing to 10% Bitcoin exposure

Portfolio Applications

- **Capital efficient Bitcoin exposure:** 10% allocation to Bitcoin does not require any additional capital outlay. Can be substituted 1:1 with another US equity fund without reducing equity exposure.
- **Bitcoin rebalancing premium:** Bitcoin has historically exhibited strong trends, both positive and negative, with relatively low correlations to US equities. The regular rebalancing of these two assets can potentially result in significant total return benefits.
- **Ideal entry to Bitcoin:** Bitcoin's high volatility can dissuade investors from initiating a position. SPBC can serve as an entry to the asset class, with the equities serving to dampen the volatility of a pure Bitcoin position.

Details | Ticker: SPBC | Inception Date: 5/24/2021

As of 12/31/24

SEC 30-Day Yield	Gross Expense Ratio	Exchange	CUSIP	Net Assets

DEFINITIONS:

Global Market Portfolio: Represents all assets—stocks, bonds, real estate, commodities, and other investments issued by governments and corporations—weighted in proportion to their relative market values.

K-1: Schedule K-1 a federal tax document used to report the income, losses, and dividends of a business' or financial entity's partners or an S corporation's shareholders.

Market Price: The current price at which shares are bought and sold. Market returns are based upon the last trade price.

NAV: The dollar value of a single share, based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated at the end of each business day.

Notional Exposure: The full market exposure a derivatives contract provides after accounting for the leverage embedded in the derivative, expressed as a percentage of the fund's total assets. We assume each option's delta (sensitivity to changes in underlying) is 1 in this calculation, implying that we are measuring the exposure afforded by the options in the instance where extreme markets are being realized. This metric provides a measure of the protection afforded to the underlying security by a given option position.

SEC 30-Day Yield: The yield is calculated with a standardized formula and represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price. The yield includes the effect of any fee waivers and/or reimbursements. Without waivers, yields would be reduced. This is also referred to as the "standardized yield", "30-Day Yield" and "Current Yield". The unsubsidized SEC 30-Day Yield does not reflect the effect of any fee waivers and/or expense reimbursements.

S&P 500 Index: The index includes 500 leading U.S. large cap companies and captures approximately 80% coverage of the available market.

IMPORTANT INFORMATION:

Investors should carefully consider the investment objectives, risks, charges, and expenses of Exchange Traded Funds (ETFs) before investing. To obtain an ETF's prospectus or Summary prospectus containing this and other important information, please call (855) 772-8488, or visit SimplifyETFs.com. Please read the prospectus carefully before you invest.

An investment in the fund involves risk, including possible loss of principal.

The fund is actively-managed is subject to the risk that the strategy may not produce the intended results.

The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

The Fund invests in ETFs (Exchange-Traded Funds) and is therefore subject to the same risks as the underlying securities in which the ETF invests as well as entails higher expenses than if invested into the underlying ETF directly.

Bitcoin Risk: The value of the Fund's investment in the Grayscale® Bitcoin Trust is subject to fluctuations in the value of bitcoins. The value of bitcoins is determined by the supply of and demand for bitcoins in the global market for the trading of bitcoins, which consists of transactions on electronic bitcoin exchanges ("Bitcoin Exchanges"). Pricing on Bitcoin Exchanges and other venues can be volatile and can adversely affect the value of the Grayscale® Bitcoin Trust. Currently, there is relatively small use of bitcoins in the retail and commercial marketplace in comparison to the relatively large use of bitcoins by speculators, thus contributing to price volatility that could adversely affect the Fund's investment in the Grayscale® Bitcoin Trust. Bitcoin transactions are irrevocable and stolen or incorrectly transferred bitcoins may be irretrievable. As a result, any incorrectly executed bitcoin transactions could adversely affect the value of the Fund's investment in the Grayscale® Bitcoin Trust.

Cryptocurrency Risk: Cryptocurrencies operate without central authority or banks and are not backed by any government. Cryptocurrencies may experience very high volatility, and related investment vehicles that invest in cryptocurrencies may be affected by such volatility. Cryptocurrency is not legal tender. Federal, state or foreign governments may restrict the use and exchange of cryptocurrency, and regulation in the U.S. is still developing. Cryptocurrency exchanges have stopped operating and have permanently shut down due to fraud, technical glitches, hackers or malware. Cryptocurrency exchanges are new, largely unregulated, and may be more exposed to fraud.

¹Cryptocurrency Tax Risk: Because the Subsidiary is a controlled foreign corporation, any income received by the Fund from its investments in the Subsidiary will be passed through to the Fund as ordinary income, which may be taxed at less favorable rates than capital gains. The Fund's investment in Grayscale Bitcoin Trust or similar investment vehicle is a grantor trust for U.S. federal income tax purposes, and therefore an investment by the Fund in such an investment will generally be treated as a direct investment in a cryptocurrency for such purposes.

Grayscale Bitcoin Trust Risk: The Fund will invest indirectly in bitcoin through the Grayscale Bitcoin Trust. The Grayscale Bitcoin Trust is a private investment fund that is not regulated under the 1940 Act. The shares of the Grayscale Bitcoin Trust may trade at a premium or discount, may not directly correspond to the price of Bitcoin, and are highly volatile.

Futures Contract Risk: Futures contracts involve the following risks (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the forward or futures contract; (b) possible lack of a liquid secondary market; (c) leverage, which means a small percentage of assets in futures can have a disproportionately large impact on the Fund and the Fund can lose more than the principal amount invested; (d) losses are potentially unlimited; (f) the possibility that the counterparty will default in the performance of its obligations;

Wholly-Owned Subsidiary Risk: The cost of investing in the Fund will be higher because you indirectly bear the expenses of the Subsidiary. The Subsidiary is not registered under the Investment Company Act of 1940 ("1940 Act"), as amended, and, unless otherwise noted in this Prospectus, is not subject to all of the investor protections of the 1940 Act, such as limits on leverage when viewed in isolation from the Fund.
